Professor J. Lederberg,
University of Wisconsin,
Madison, Wisconsin, U.S.A.

Dear Professor Lederberg,

In the course of our work with pyrimidines and B. coli we have come across the need for a thymine-requiring strain of B. coli K12, preferably K12s. We wondered if by chance you had such a strain in your collection and if so we would be most grateful if you could let us have a culture.

Yours sincerely,

(J. D. Smith)
